1. **Vacancies.**—The following vacancies will be filled by direct appointments:—

Bengal Civil Service (Executive) 6

In addition to these appointments four appointments in the Upper Division of the Bengal Secretariat clerical service will be available to candidates who qualify for appointment to the abovenamed service but whose places in the list are not sufficiently high to enable them to secure appointments.

Under the terms of the Finance Department Resolution No. 3219F., dated the 7th August 1931, the new recruits will on first appointment be appointed on a provisional basis and draw as initial pay that at present sanctioned minus 15 per cent. No direct appointment will be made to the Bengal Police Service, the Bengal Excise Service, the Bengal Junior Civil Service or the Bengal Junior Excise Service.

Each candidate will be required to specify in his application the service or services for which he desires to compete, placing them in the order of his preference, and *the choice thus indicated will be final.* Appointments will be assigned to successful competitors with due consideration of their choice and the number of vacancies in the services.

2. **Method of recruitment.**—The appointments will be made by competitive examination in the manner prescribed in Part B of Schedule II of the Bengal Provincial Services Recruitment Rules.

3. **Qualifications.**—The indispensable qualifications of a candidate are—

(*i*) that he is a native of Bengal or has a permanent domicile within the Presidency of Bengal;

(*ii*) that he is a natural born subject of His Majesty, or of an Indian State in respect of whom the Governor General in Council has made a declaration under section 96A of the Government of India Act;

(*iii*) that he shall have attained the age of 22 and shall not have attained the age of 25 on the 1st October 1931;

Along with his application every candidate shall submit proof of his age as explained in the form of application and certificates, written not more than one year prior to the date of his application, from two responsible persons unconnected with his College or University, and not related to him, testifying to his private character and stating that he is a native of or has a permanent domicile within the Province of Bengal.

4. **Applications—Method of submission of fee, etc.**—(*i*) A person desiring to be admitted to the examination shall apply before the 15th November 1931 to the head of the college from which he passed his

examination for the degree of Bachelor of Arts, Science, Commerce, etc. A candidate who passed the examination as a non-collegiate student shall send in his application to the Registrar, Calcutta University, together with a certificate of character signed by the Principal of his college if he was connected with one, and by the Magistrate of the district in which he is resident in other cases; candidates from the Dacca University shall apply to the Registrar, Dacca University. All other candidates (not included in the previously mentioned categories) shall apply to the Director of Public Instruction, Bengal:

Provided that in no case shall a candidate apply to more than one of these authorities, and that such application shall always be made through their Durbars by persons resident in a State in India.

(*ii*) Applications shall be made, in the form shown in Schedule I, copies of which may be obtained from the heads of colleges, the Registrars of the Calcutta and Dacca Universities, and the Director of Public Instruction.

(*iii*) No application will be taken into consideration by the receiving authority unless it is accompanied by non-judicial stamps of the value of Rs. 5 or a chalan showing payment into a Government treasury in Bengal of the sum of Rs. 5. This payment is obligatory whether such application is subsequently rejected or not. Applications stamped with postage stamps will not be accepted.

5. **Selection Committee.**—The Government of Bengal will appoint a Selection Committee to examine the applications of nominated candidates and their eligibility for admission to the examinations. This Committee will be composed of officials and non-officials in equal numbers and will be presided over by a high officer of Government.

6. **Nomination.**—The heads of colleges, the Registrars of the Calcutta and Dacca Universities, and the Director of Public Instruction, Bengal, shall forward to the Selection Committee before the 30th November 1931, the applications of candidates nominated in accordance with the allotment of nominations shown in Schedule II and shall certify the moral character of each candidate so nominated. The application of non-collegiate students nominated by the Registrar of the Calcutta University should be supported by the character certificates mentioned in paragraph 3 above. In making these nominations, due regard should be paid to the desirability of different classes and communities being represented in the public service. Care should be taken to nominate only such candidates as are likely to pass the medical examination since experience shows that a considerable number of candidates successful in the literary examination fail to pass the medical test.

7. **Selection certificates.**—In order to make the appraisement of individual merits of candidates possible, the Selection Committee shall issue certificates of selection to such of the nominated candidates, not exceeding 200 in all, as it considers qualified to appear at the examination. The selection or rejection of a candidate by the Selection Committee shall be final, and no candidate shall be admitted to the examination unless he holds such a certificate:

Provided that in making their choice the Selection Committee shall give all possible consideration to the cases of candidates of the minority communities and the backward classes and shall call for further nominations from the heads of colleges or Commissioners of Divisions if the number of selected Muhammadan candidates does not reach 45 per cent. of the total number selected.

8. **Particulars of candidates.**—The Selection Committee may require such further proof or particulars from the candidates as it may consider necessary, and may make enquiries regarding their character and domicile.

9. **Examination fee and time-table.**—Every candidate to whom a certificate of selection has been issued will, within a week from the date of its receipt, deposit in the nearest treasury in Bengal a sum of Rs. 50 as examination fee and forward the receipt for the same to the Secretary to the Selection Committee. No part of the fee will be returnable to a candidate. Delay in this respect may render a candidate's name liable to removal from the list of examinees. On complying with this requirement, the candidates will receive from the Secretary a time-table for the examination. The examination will commence on the 15th February 1932 and will be held at the Presidency College, Calcutta.

10. **Canvassing.**—Any attempt on the part of a candidate to enlist support for his application through persons of influence or officials of Government will disqualify him for appointment. Spontaneous recommendations from persons interested in the candidates, or otherwise known to them, will be disregarded.

11. **Ineligibility of Government servants.**—Unless specially exempted by Government by general or special order, no person holding a substantive appointment in Government service is eligible to appear at the competitive examinations. Whenever such exemption is granted, the candidate will be subject to selection by the Selection Committee, as if he were duly nominated under paragraph 6 above.

12. **Syllabus of examination and marks.**—The examinations will be held in the subjects and according to the syllabus shown in Schedule III which also indicates the numerical value to be attached to each paper at the examination.

As the possession of a knowledge of a provincial vernacular is an essential condition of appointment, candidates, whose ordinary spoken and written language is not Bengali, must take up translation from English into one of the provincial vernaculars named below:—

(*i*) Bengali,

(*ii*) Hindi,

(*iii*) Urdu,

(*iv*) Nepali,

and *vice versa* in the compulsory paper. Successful candidates, however, who have offered any language other than Bengali in that paper and are appointed to a service for which there is a Departmental Examination, will be required to pass completely the Departmental Examinations in Bengali within two years of the date of their appointment to the service.

13. **Medical Examination.**—As soon as the results of the examinations have been declared, a proportion of the candidates who have qualified will be called upon to appear before a Medical Board for a certificate of their fitness for Government Service in form A of Schedule IV of the Bengal Provincial Services Recruitment Rules. An order to appear before the Medical Board must not however be understood to mean that the candidate, if found fit, will necessarily receive an appointment as the number of candidates who will be summoned for medical examination will be slightly in excess of the total number of vacancies, and the question of his appointment will depend upon the results of the medical examination taken as a whole. The regulations governing the physical examination of candidates are set forth in Schedule IV of the Bengal Provincial Services Recruitment Rules and intending candidates are advised before they apply for admission to the examination to satisfy themselves that they are likely to qualify as physically fit under those regulations, for recent experience has shown that a considerable number of the candidates at the competitive examinations are subsequently rejected by the Medical Board as unfit.

RESOLUTION.

Simla, the 5th September, 1931.

No. D./5905-F.—The Indian Central Banking Enquiry Committee was appointed in the Government of India Resolution No. F. 2 (4)/F.-29, dated 22nd July 1929, with Sir Bhupendra Nath Mitra, K.C.S.I., K.C.I.E., C.B.E., as Chairman, and Sir Purshotamdas Thakurdas, Kt., C.I.E., M.B.E., as Vice-Chairman. The Enquiry was inaugurated in response to a demand from the Federation of Indian Chambers of Commerce and Industry and the Associated Chambers of Commerce of India and Ceylon at their annual meetings in 1927 and 1928, and the plan of Enquiry was settled in consultation with the two commercial bodies mentioned above and after discussions with the representatives of the various political parties in the Central Legislature. According to this plan, a number of Provincial Committees were appointed to deal with agricultural credit, including co-operative credit, credit facilities for small industries, mortgage banks, financing of internal trade and stimulation of habits of investment and attraction of banking deposits and to make a report to the Central Committee. After the Provincial Committees had reported in the summer of 1930, the Central Committee continued the work by making investigation into those fields of banking, such as regulation of banking, banking education and credit facilities for India's main industries, which were excluded from the scope of the Enquiry by Provincial Committees. The Central Committee completed the survey of the whole banking field by the end of 1930. At this stage the Government of India invited a small body of Foreign Banking Experts to assist the Central Committee in making their final recommendations. The Foreign Experts after holding joint discussions with the Central Committee presented to the Central Committee, for submission to the Government of India, a separate report dealing with certain differences of opinion between themselves and the Central Committee. The Central Committee held their final deliberations in March and April 1931, and their Report along with the Report of the Foreign Banking Experts was received by the Government of India on the 14th June 1931.

2. The Governor General in Council desires to take this opportunity of recording his appreciation of the services rendered by the Chairman, Vice-Chairman and members of the Committee. The Report bears testimony to the care and thoroughness with which the Enquiry, which has been prolonged and arduous, has been conducted and brought to a successful conclusion by the members of the Committee.

3. The Governor General in Council has already communicated to the Chairman and members of the Provincial Committees, through the Provincial Governments concerned, his sense of appreciation of the services rendered by them. He wishes to take this opportunity again of expressing his cordial appreciation of the valuable work done by the Provincial Committees.

4. The Foreign Banking Experts came out to India at great personal inconvenience and considerable sacrifice in response to invitations from the Government of India. The Governor General in Council desires to express his cordial thanks to these gentlemen both on his own behalf and on behalf of the Indian Central Banking Enquiry Committee for the assistance they gave to the Central Committee in the short space of time at their disposal.

5. The recommendations of the Committee are receiving the careful and earnest attention of the Government. Meanwhile the Governor General in Council has decided that the Report be published for general information on the 16th September 1931.

ORDER.—Ordered that a copy of the above Resolution be communicated to all Local Governments and Administrations, all Departments of the Government of India, the Central Board of Revenue, the High Commissioner for India, the Chairman, Vice-Chairman and the members of the Indian Central Banking Enquiry Committee, the Foreign Banking Experts (through the India Office), the Chairmen and members of the Provincial and Centrally administered areas Banking Enquiry Committees for information.

Ordered also that it be published in the *Gazette of India*.

Annual Report of the Royal Botanic Gardens and the Gardens in Calcutta and of the Lloyd Botanic Garden, Darjeeling, for 1930-31.

ROYAL BOTANIC GARDEN.

1. **General.**—Amongst the general public who discuss the prospects of a visit to these gardens, the question of their approach is always one of first consideration. No one who is dependent on a motor car for coming—and this section of the visiting public grows in numerical importance every year—will think of starting out without first making the necessary enquiry as to the state of the roads. Their condition is a matter of public interest and for general information, therefore, it may be mentioned that the riverside road through Howrah to the gardens has been greatly improved of late and that, apart from the unpleasantness of having to negotiate an ever-increasing volume of traffic, the ease and comfort of access dependent so much now-a-days on road surface is noticeably better than it was even as late as a year and half ago.

A policy of steady repairs—the stitch in time method—seems responsible for this, and whether or not the betterment of roads is responsible there has been a marked increase in the number of visitors reaching the garden by bus and car. Praiseworthy attempts to maintain and improve the main roadways have been made and it is a pity, therefore, that obstacles to using them freely should exist. Riverways access is, of course, always the more pleasant, but in view of the ever-growing bus and car traffic and the possibility of the ferry service being restricted, it is a matter of extreme importance to these gardens and, indeed, to all interests west of the Bengal-Nagpur Railway, that free passage should prevail over this Company's line systems converging on Shalimar.

It is more pleasant, perhaps, to get on to congenial surroundings and discuss the garden itself. Both in the nurseries and flower beds, in the plant houses and in the open, there is a year's steady progress to report. Climatic conditions were normal and at no time of the year had special measures to be taken to help out the ordinary horticultural work. Rainfall recorded for the year was about the usual, its distribution was good and this with an absence of cyclonic storms combined to make the year a favourable one for all horticultural operations. The permanent tree and shrub collections in the open were enriched by numerous additions and long-established specimens have not been spared in an effort to make the gardens more attractive. Perhaps the scientific officer is too apt to think of the contents of a garden as botanical specimens and to concern himself with the presence and arrangement of these rather than with their form and beauty. A break with tradition is, therefore, not necessarily disadvantageous to methods—and it may be invigorating and refreshing—to have for a time on the staff an officer whose experience brings ideas of big scale tree pruning and surgery. Mr. Fothergill, the newly appointed officer in charge, was assiduous in his endeavours, by judicious pruning and lopping, to restore the appearance of old time plants that had grown away from their natural stateliness and beauty and by larger scale operations to give a chance of fresh life to dying and diseased specimens.

The desirability of making the garden richer as a living repository of the more beautiful and useful tropical and semi-tropical trees and shrubs is always in mind, and the following additions of plants new to the collections show what has been accomplished to this end during the year. Of new trees there have been added *Alphonsea lutea*, *Erythrina acanthocarpa* and *Blackii*, *Prosopis velutina*, and *Melaleuca crassifolia*. Of shrubs, *Cordia Holstii*, *Hibiscus Abelmoschus*, *Anona microcarpa*, *Erythrina tomentosa* and *indica*, *Parkinsonia microphylla*, *Lantana crocea*, *Psidium Friedrichsthalianum*, *Bauhinia Krugii*, *Millettia dura*, *Bambusa quadrangularis*, *Ptelea trifoliata*, *Pandanus Sandei*, *Costus discolor*, *Fatsia papyrifera* and *Cassia artemisioides*. Of creepers, *Lonicera Leschenaultii*, *Passiflora pruinosa*, *Cissus Lindeni*, *Cissus albonitens*, *Boussingaultia basellodes*, *Bougainvillæa spectabilis*, varieties: *Fraser* and *Cypheri*. In some cases single numbers of these only have been available, but in most cases three or four specimens have been planted and in a few there has been material for groups. Experience has shown that not all planted out have succeeded but, as explained

in previous reports, repetitions of those that fail will be made from the nurseries where an ever-increasing variety is being developed by the accession of seeds and plants from India and abroad.

The nurseries are now much richer than at any time in the previous experience of the writer and, although the additions planted out to permanent situations are too small to catch the eye, and insignificant as yet as producers of scenic and group effects, they are yet plentiful enough to make certain in future of a much richer and more interesting botanical garden.

It is unfortunate that the display of cold weather annuals seldom coincides with the New Year period. They are never at their best till later, but this year's display, while possibly not surpassing former years in mass production, has been easily the best seen here in respect of individual specimens. As in the past few years they have been staged at the more frequented and open spots of the garden and have been much admired not only by the general public but by the trained horticulturist. This is a visitor whose eye looks critically and who usually has never yet been known to admit his own results as inferior or to lack experience or knowledge of something better. His approbation is, therefore, sought. This year it was as freely given as it was deserved. In order that the gardens may look more attractive during the Christmas and New Year Week, the period when they are most frequented, arrangements have been suggested for a display of bulbous plants to take the place of the annual stagings before the usual supply of potted flowers is ready. The idea is worth following up for the development of bulbous plants is less at the mercy of weather conditions and many of this class lend themselves to forcing methods. In addition to potted annuals staged in groups throughout the garden, the usual area of flower beds was maintained. Minor rearrangements of beds were made in the main flower garden and a new harbaceous border, containing amongst others some beautiful varieties of *Gladiolus*, was opened round the smaller palm house.

The Orchid house was as usual a source of great attraction during the first two warm months of the year. The display was normal and calls for no special mention. Species of *Vanda*, *Catasetum*, *Cattleya* and especially *Dendrobium* comprised the bulk of the display. The rarer kinds of Orchids, of which the gardens possess a few fine specimens, are not risked in the houses open to the public, and this for reasons that will suggest themselves to all. But these and also a fine collection of ferns and *Cacti* under glass can always be visited by special arrangement.

Needless to say none of the garden schemes sanctioned and awaiting funds could be proceeded with during a year financially so difficult as that just passed. Garden labour has, perforce, to remain in its insanitary hovels and make do. Neither the river bank nor the roads, the care of which was decided some years ago as an unsuitable charge for garden officers, has yet gone over to departments of Government specialising in these works. This leaves them a charge on garden funds proper, and, as both take not a little upkeep, it has been impossible to do anything in the way of other large scale garden improvement. Mr. Fothergill has made praiseworthy attempts to keep the lake edges and surfaces in a sanitary condition and a few of the main roads have had specialised asphalt treatment, but in respect of roads, river bank and tanks the gardens are living on capital value and the best that can be done in the present conditions of financial stringency is to distribute the funds available over all works according to immediate necessity and to stave off the condition of garden deterioration that looms ahead. This is the policy followed. It is unsatisfactory from every point of view and especially is it uneconomical as allowing only patchwork where thorough repair is needed, but it appeals in present conditions as most in tune with the spirit of co-operation and it is preferable to the alternative of letting ruin overtake certain works destined for other departments.

Mechanical innovations cannot be said to appeal to the local popular imagination and the institution during the year of a motor tractor with grass cutting machines has drawn the usual resentment as a disturbance of old time methods. But the tractor has come to stay, for it is cheaper, quicker and more effective than the grasscutter and scytheman and makes conservancy easier for a staff now hard put to it to maintain the garden as it formerly was.

From the visiting public's point of view the most urgent scheme is that for the provision of drinking water. Funds for this were allotted but had to be withdrawn on account of the prevailing financial condition.

The completion of this simple and inexpensive scheme would, possibly, do more for the popularity of these gardens than any other measure. Visitors complain of the drawback all the time and in the hot weather, it will be understood, complaints are not lacking in pointedness. One would like to think of public spiritedness extending in this direction. The giving of water has come down through all history and in all lands as an action bespeaking goodwill, beneficence and charity. Even the dumb animals are not forgotten in this respect. Here at the Royal Botanic Garden the most long suffering animal is man. He it is who suffers and who would bless a public benefactor.

2. **Plant and seed exchange.**—Records show some 284 plants received and 14,524 sent out. As usual Government institutions, District Boards, Municipalities and Railways are the chief recipients. The garden took its share in staging materials for the annual show at Alipore held under the auspices of the Agri-Horticultural Society. The display of *Dahlias*, in particular, attracted attention and a miniature flower garden set up apart from competitive exhibits, was also much admired.

Besides two casks of mahogany seed received from Kew, 47lbs. and 286 packets of seed were distributed while 215 packets were received, mainly from institutions abroad. For the information of botanical and horticultural institutions throughout the world it may be mentioned that the common practice of issuing exchange seed lists is not regularly followed by the Royal Botanic Garden, but its services are freely at the disposal of such institutions and all are invited to communicate when the question is one of obtaining Indian material.

3. **Herbarium and Library.**—Routine work on acquisition, identification, distribution and loan has proceeded uninterruptedly throughout the year. Prominent amongst distributed lots are 611 specimens of Himalayan plants to Austria, 692 Malayan duplicates to Washington and some 1,765 sheets to Dr. Cowan at Edinburgh. For acquisitions our thanks are chiefly due to the Director, Botanic Gardens, Singapore, for 286 duplicate specimens of South-East Asian plant; to the Mycologist in charge, Natal Herbarium, Botanic Gardens, Durban, South Africa, for 100 duplicates; to the Systematic Botanist, Coimbatore, for 243 duplicates; to the Regius Keeper of the Edinburgh Botanic Garden for 137 sheets; and to the National Museum, Washington, for 46 duplicates of New World plants.

Specimens of South Indian plants have as usual been on loan to Kew in connection with the continuation of the "Flora of Madras." To Kew has also gone on loan small numbers of old sheets of *Psychotria* and *Ixora* to help clearing up difficulties on the systematic position of certain little known members of these genera. For a forthcoming work in the genus *Trapa* all our material of this aquatic has gone to Dr. Glück of Heidelberg as also certain fresh material to aid in the same study. About 1,500 sheets have been incorporated during the year and 1,115 genus or species covers renewed. Repair, mounting and poisoning work have been carried on as usual.

To Mr. Kanjilal has gone, at different times, quite a number of authenticated species to aid him in his work on the "Flora of Assam." Mr. Kanjilal has spent a good deal of time at work on his material in the herbarium and Mr. Parkinson spent some weeks on collections from Burma that had remained unplaced or the identifications of which were for various reasons still considered tentative. The short time at his disposal prevented an examination of all the material, but enough was done to indicate the presence of new or interesting species. In addition to his work Mr. Parkinson gave much appreciated help in the identification of garden Bamboos. Mr. D. Datta of the Indian Agricultural Service visited the herbarium for some time towards the end of the year in connection with his enquiry into the grasslands of Bengal. His visit resulted in arrangements for collaboration with the Curator of the Herbarium and together these officers have a paper on this subject under preparation. These visits for botanical work are mentioned as types of which Sibpur could wish more.

Several survey tours were undertaken during the year. Of survey officers, Mr. S. N. Bal toured with Mr. Biswas in the Bikrampur area of East Bengal, in the Naga Hills and in Manipur and much material accrued to the herbarium as a consequence. Mr. Srinivasan continued exploration in the Garo Hills and brought some 2,000 sheets containing some 500 species. His interest in and ability as a photographer is being directed towards photographically recording, both whole and in dissections, some of the more interesting garden plants. The most junior officer, Mr. Badhwar, has spent nearly the whole year on tour in

the North-West. His work is mainly economic, being an enquiry into the possibilities of the North-West as a source of Santonin, but his botanical interests are wide and the herbarium is likely to be considerably the richer by reason of his general collections. Towards the end of the year the Curator of the Herbarium was deputed to continue botanical exploration of the Burma Cinchona Reserve area, a survey that is yielding much material and that will be continued as funds and staffing arrangements permit.

To the office and herbarium staff was entrusted the work of distributing a fairly large quantity of seed of *Aleurites Fordii* received from Kew at the close of the year. India shows some promise of being a suitable home for the Tung Oil Plant and this distribution was part of an effort to demonstrate the local possibilities of this oil industry. Tea gardens of Assam, especially, are interested in this importation.

The routine work of the library has been going on as usual, but accessions have been greatly restricted by the fact that library funds have to finance departmental publications as well as do library work proper. In view of the sums required for the publication of the Annals, all that could be done for the library was to maintain a restricted supply of the most necessary botanical periodicals. Some 50 copies of Dr. Cowan's "Trees of Northern Bengal" have been distributed from the library during the year.

4. **Publications.**—Of garden publications, Volume XIII of the Annals, being Professor Martelli's Asiatic Palms, Corypheæ, has passed through the Press. With the issue of this volume a halt is called for a time at least in this, the greatest work ever attempted on the palms. The next volume will be Sir David Prain and Mr. Burkill's monograph of the genus Dioscorea and by the end of the year the bulk of the plates for the first half of this work had already been prepared.

Of the records, Dr. Brühl's "Census of Indian Mosses" has appeared. It is a valuable compilation on the group in which is brought together much of the information that has been accumulated by previous workers, as well as much that is the result of the personal observation of the author. It will be an incentive to young Indian botanists to tread in this and other engaging fields of Botanical study.

5. **Finance.**—Out of a total budget allotment of Rs. 50,279 for staff and permanent establishment, Rs. 50,223 were spent and under all other heads there was a net saving of Rs. 431 out of a net grant of Rs. 65,049. As a measure of retrenchment necessitated by the prevailing financial difficulty, a sum of Rs. 5,493 had to be surrendered to Government. Receipts of the department during the year amounted to Rs. 670-13-3.

6. **Staff.**—The writer held charge as Superintendent and Mr. Biswas was Curator of the Herbarium throughout the year. Up till the end of July Mr. N. Mitra was Curator of the Garden. Thereafter, he proceeded on 28 months' combined study and other leave. The continuance of his work as Curator till the end of the year was provided for by bringing in a trained horticulturist, Mr. Fothergill, from the Cinchona Branch of the service. Maulvi Quasem Ali officiated as Assistant Curator throughout the year and Mr. Joneja very ably filled the post of Overseer. The clerical establishment headed by Babu Ashutosh Banerjee, in his customary, forceful and thorough manner, worked loyally and well. With minor exceptions, subordinate officers and all the clerical establishment have been loyal.

CALCUTTA GARDENS.

Efforts were made to improve the standard of excellence of flowering annuals exhibited in different parts of the Gardens. Some fifty different species of plants were introduced and stocks of ferns and potted palms and orchids were rearranged in the nursery. Several newly laid out beds not only increased the decorative effect but prevented the public from making unsightly short tracts and thereby spoiling the beauty of the lawns of the gardens. The arrangement of shifting refuse and other material in motor lorry resulted in greater facility of transport. Difficulties of keeping the Eden Garden tanks in sanitary condition have temporarily been overcome by leasing out the tanks for pisciculture Under this arrangement the lessee has to keep the tanks clean and to pay a sum of Rs. 200 annually, and this is an item of importance so far as garden expenditure is concerned.

Funds provided for the repair of the garden roads were withdrawn and this will entail a reversion to the old practice of a large expenditure over four years or so. This, unfortunately, is more expensive as well as less satisfactory in the long run.

Finance.—Out of a sanctioned allotment of Rs. 23,059, there was a small saving of Rs. 89. A total revenue of Rs. 313 obtained in the Dalhousie Square section by issuing fishing passes and by leasing out tanks of the Eden Gardens was paid into the Treasury.

Staff.—Mr. M. Jones, officer in immediate charge under the Curator, creditably held the post of Assistant Curator, Government Gardens, throughout the year, and Mr. Gholam Mohiuddin was temporary Overseer from the 22nd April 1930 till the end of the year.

LLOYD BOTANIC GARDEN, DARJEELING.

A few inches less rainfall than the normal and a hailstorm did not affect the general condition of the plants of the garden. Considerable success has been attained by Mr. S. N. Basu, the Curator, in his attempt to increase the æsthetic and horticultural value of the garden by laying out more than a hundred artistic beds, and by keeping the roads, garden houses, lawns and tanks tidy. Suitable sitting accommodation under the shades of the trees have also been provided for the public. Many new varieties of annuals have been grown this year for exhibition. To replace the old stock of the garden some varieties of *Magnolias*, *Azaleas*, *Camellias* and *Cherries* have been imported from Japan. By horticultural experiment the Curator has been successful in propagating some of the rare species of the garden, such as *Larix Griffithii* and *Meconopsis grandis*. If the latter can be fruited this garden may be in a position to meet the demand, for the seeds of this species, of many of the gardens. The garden has been enriched by planting about 517 young trees and shrubs. About 7,703 seeds, 2,228 plants, 120 bulbs and 8,141 seedlings have been distributed to the different botanical, horticultural and other institutions of the world. Seeds of *Meconopsis grandis* collected this year have been supplied to the Director, Royal Botanic Garden, Kew; Regius Keeper, Royal Botanic Garden, Edinburgh, the Keeper of Royal Botanic Gardens, Glasnevin, Dublin, and Sir Reginald Spence. Collection of Alpine seeds has been made from Jongri plains and Gyache La and the garden thus maintains its tradition as an important centre for the distribution of Alpine plants.

Seeds and plants, for His Majesty's Royal Park, under the orders of His Excellency the Governor of Bengal, were also collected in Bhutan. The success of the collection was largely due to the willing help given by Raja S. T. Dorji, the British Agent in Bhutan. Some of the plants collected are being grown in baskets and are being prepared for the onward journey. As desired by His Excellency 115 packets of seeds collected chiefly in Bhutan and in the Alpine Himalayas of Sikkim, have been handed over to the Private Secretary to His Excellency the Governor for His Majesty's Royal Park.

About 14,000 visitors paid visits to the garden and the garden thus holds its time-honoured reputation for botanical interest and popularity as a public resort.

Finance.—Out of a total allotment of Rs. 19,078 under all heads Rs. 19,039 were spent leaving a small balance of Rs. 39 as savings.

Staff.—Mr. S. N. Basu held charge of the post of Curator till the 30th March 1931. Thereafter, Mr. J. E. Leslie, the permanent incumbent of the post, returned from leave and took over charge on the 31st March 1931.

The Committee desire to place on record their appreciation of the services of Rai Bahadur B. K. 8 durwans	2 bhistis
20 keepers	1 cook
14 gardeners	1 head gardener
3 sweepers	2 cartmen
1 night-watchman.	1 syce

1 scytheman.

The health of the collection was good during the year under review. There was no epidemic except an outbreak of Foot and Mouth disease amongst the gayals in the South Extension, but the prompt measures immediately taken enabled it to be completely stamped out without loss. A serious loss has, however, been sustained in the death of the male Indian rhinoceros which took place suddenly on the 21st May 1930. A *post-mortem* examination was conducted by the Principal, Bengal Veterinary College, and the viscera were sent to the Chemical Examiner to the Government of Bengal for report. Traces of arsenic were detected in the viscera and it was concluded that the death of the animal was due to poisoning by arsenic administered by some unknown and malicious person. To detect the perpetrator proved impossible, and the Committee are at a loss to account for so wanton an outrage which can profit no one and only diminishes the interest of a collection which is maintained for the instruction and entertainment of the public. The loss is the more serious by reason of the circumstance that it is most difficult to obtain a specimen to mate with the female in the collection.

Many interesting breeding results took place during the year and a large proportion of the young animals born were reared.

As was stated in the last year's report it was intended to reduce the road area of the Garden and to increase correspondingly the grass area. The first section of this work was commenced as soon as the rains began and completed in good time before the cold weather. The areas in front of the Entrance Gate, in front of the Reptile House, adjoining the Peacock House and in the New Extension were re-aligned and laid out in accordance with the orders of the Committee. The drive round the Gardens from the Entrance Gate on the east to the Reptile House was reduced to 20 feet in width and from the Reptile House to the Entrance Gate to 12 feet. All adjacent paths and roads were also reduced in width. The grass area round the Schwendler Memorial was increased as also the areas between the Southern Extension and the Central Monkey House. The result of these alterations has been largely to improve the appearance of the Gardens, in addition to reducing the cost of maintaining roads and paths.

The only work of importance undertaken during the year is the New Aviary measuring 39 by 29 feet divided into 8 compartments. This aviary is built on a high plinth and with a very thin mesh of strong link wire every effort has been made to make it rat-proof. It has been stocked with many varieties of new birds, making a fine display.

To deal with large crowd of visitors on holidays another shed with additional turnstiles has been constructed on the northern side of the main Entrance Gate.

During the past year the annual repairs were carried out as usual and with the exception of the boundary wall, all large houses were cleaned, repaired and repainted of which the following is a list:—

Dumraon House.—The house was thoroughly repaired and painted. The iron bars of some of the inner cages were repaired and the wooden doors were attended to and leaks in the roof repaired.

Paddocks.—The wood work and the roofs of the kiosks of the Barasingha Enclosure and the Banteng Enclosure having fallen into very bad condition, they were thoroughly repaired and the wooden roofs were covered with zinc sheets and painted.

Sarnomoyi House.—Thorough repairs were done to this house. The sand plastering and wood work of the inner rooms had been damaged by the parrots and were repaired. The outside walls were colour-washed and the doors and windows painted.

Burdwan House.—The roof was overhauled and made watertight. The sand plaster was scraped off where necessary and new sand plaster substituted. The outer and inner dens were repaired and lime-washed and outside walls colour-washed.

Servants' Quarters at Begunbari.—The servants' quarters needed repairs badly and were overhauled. New drains were laid and all the rooms were put in good repair, cleaned and painted.

Store Godown.—Extensive improvements have been made to the Store Godown. The floors of the sheds having subsided in many places, were relaid and the corrugated roofings repaired and renewed. The terraced roof of the godown was overhauled and made watertight.

The whole godown was cleaned and inside walls lime-washed and outside walls colour-washed. The wood work and the doors and windows were painted. The following buildings were repaired and repainted:—

Entrance Lodge and Office, Refreshment Pavilion, Soneburra Enclosure, Gubbay House, Reptile House, Murshidabad House, Indian Refreshment Room, Small Carnivora House and Schwendler House.

The following houses were repaired and colour-washed:—

Ezra House, Rodent House, Bear House and Tapir Enclosure.

In addition to the above, a considerable amount of work of a minor but nevertheless important character has been carried out during the year. Included in such work are the repairing and replacing of worn wire-netting on aviaries and enclosures, the repairing of fences, repairing roofs and floors, rat-proofing of buildings.

The lawns, flower-beds and paths were suitably maintained in orderly condition and considerable quantities of vegetables were grown in the vegetable Garden for the use of the collection.

In addition to ordinary routine work new flowering shrubs were planted and old trees were replaced by others. There has been a marked improvement in the general cleanliness and absence of litter throughout the Gardens. Many exhibits were displayed at the Agri-Horticultural Society's Flower Show and the Garden was awarded several prizes.

There was a considerable falling off in the Entrance receipts of the Garden. This may be accounted for by the general economic depression, particularly, though not entirely, in connection with the receipts on Sundays. It may also be attributed to disturbed conditions resulting in the public not availing themselves of the opportunity afforded by holidays and other non-working days of visiting the Gardens. It is to be hoped that such effects are only transitory for it can be asserted with confidence that at no other Zoological Gardens can so large and varied a collection be seen at a cost of one anna. The financial condition of the Garden, however, is on the whole satisfactory, due to the rigid economy which has been practised during the year in all departments.

The following is a comparative statement of visitors and receipts for the last four years:—

	Number of visitors.	Receipts.	
		Rs.	A.
1927-28	1,107,161	76,701	2
1928-29	1,136,910	78,333	0
1929-30	1,109,901	75,609	3
1930-31	979,604	66,082	13

A large number of children under four years of age and school children, attended by their teachers, were admitted free. On the occasion of the Fancy Fair on 31st December 1930 and 1st January 1931, 9,346 people visited the Garden.

In addition, 51,731 persons visited the Gardens on free days. A detailed statement of the number of visitors and receipts appears in Appendix B.

The thanks of the Committee are due to those ladies and gentlemen who have added to the Zoological collection, a list of which is given in Appendix C. Thanks are also due to those who kindly offered to present animals to the Gardens, but whose offers could not be accepted, either because the particular species was already sufficiently well represented or owing to want of accommodation.

The Committee also desire to express their thanks to the following Railway and Steamer Companies for kindly conveying the animals belonging to the Gardens free of charge:—

East Indian Railway, Bengal Nagpur Railway, British India Steam Navigation Co., Ltd., Peninsular & Oriental Steam Navigation Co., through Messrs. Mackinnon Mackenzie & Co.,

and Rivers Steam Navigation Co., Ltd., through Messrs. Macneill & Co., and Messrs. Hoare Miller & Co., and Lionel Edwards, Ltd.

The Corporation of Calcutta sanctioned a grant of Rs. 26,233-6 to the Garden for the year under report, and the amount of the rate bills in respect of the Garden was adjusted against the sanctioned grant as the rate bills fell due. The Committee desire to take this opportunity of expressing their renewed thanks to the Corporation of Calcutta for their generous contribution to the funds of the Garden.

Thanks are also due to the Officer Commanding and Officers of the 1st Battalion, 5th Mahratta Light Infantry Regiment, stationed at Alipore, for permitting their regimental band to play at the Garden on Tuesday afternoons, free of charge.

The Committee are much indebted to those members of the public who send old and broken-down horses to the Zoological Gardens, where they are disposed of under the most humane conditions.

E. H. MARSHALL,
Honorary Secretary.

P. L. BUCKLAND,
President.

CALCUTTA, *the 18th September 1931.*

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 19th September 1931.

Monthly Weather and Crop Report of Bengal for August 1931.

I. **Character of the season.**—During the month under review, the rainfall was in excess of the normal in the districts of the 24-Parganas, Bankura, Khulna, Hooghly and Bakarganj while in the rest of the Presidency the fall was below the average. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Transplantation of winter paddy seedlings, cutting, steeping and washing of jute and harvesting of autumn paddy were progressing favourably except in parts of North and East Bengal where the operations were retarded owing to sudden flood.

III. **State of standing crops.**—The condition of standing crops was reported to be satisfactory except in the waterlogged tracts of North and East Bengal.

IV. **Prospects and probable outturn.**—The prospects of standing crops were reported to be good except in the flood-affected parts of North and East Bengal.

V. **Damage to standing crops.**—Damage to jute, autumn paddy and deepwater *aman* paddy by flood is reported from parts of Rajshahi, Rangpur, Bogra, Pabna, Dacca, Mymensingh and Faridpur. Damage by drought was reported from parts of the 24-Parganas and by insect-pests from parts of Malda.

VI. **Condition of agricultural stock.**—The condition of live-stock was, on the whole, fair. Sporadic cases of cattle-disease, however, were reported from fourteen districts of the Presidency and from the Cooch Behar and Tripura States.

VII. **Failure of pasturage and fodder.**—Some insufficiency of fodder was reported from the flood-affected tracts of North and East Bengal. As a partial remedy for this situation, this department is suggesting the cultivation of early maturing types of millet which will provide fodder for cattle within a short period of time.

VIII. **Prices of food-grains.**—During the second fortnight of the month, the retail prices of common rice of the cheapest quality rose in eight districts, fell in five and remained stationary in the rest of the Presidency. The prices ranged from 8½ seers per rupee at Burdwan to 13 seers per rupee in Midnapore and the Chittagong Hill Tracts.

IX. **Condition of agricultural population.**—The condition of agricultural population is not satisfactory owing to fall in the prices of jute and other staples. Distress continued to prevail in parts of Nadia, Murshidabad, Rangpur, Bogra and Malda where relief works continued.
